

## Question 1

review :: general knowledge	
-----------------------------	--

Define or describe each of the following:

- C++ compilation process
  - preprocess
  - compile
  - assemble
  - link
- program execution process
  - load
  - run
- named constant vs object-like macro (e.g. `const int ten = 10;` vs `#define TEN 10`)
- bit, byte, word
