Question 1

| control flow | |

- Use two **for** loops (one inside the other) to obtain the following output:

—— Output ——
```
5 4 3 2 1
5 4 3 2
5 4 3
5 4
5
```

—— Output ——

```
for (int a = 1; a <= 5; a++) {
    for (int b = 5; b >= a; b--) {
        cout << b << " ";
    }
    cout << endl;
}
```

```
5 4 3 2 1
5 4 3 2
5 4 3
5 4
5
```
